1. DANC Overview
2. Broadband things to consider
3. Tupper Lake Project
4. Technology Options
5. Grant Opportunities
6. Contacts
7. Questions

TUG HILL COMMISSION BROADBAND SERIES

June 16, 2021

Proudly Serving Our
Partners in Development

- World Class Carrier Network
- High-Speed Broadband
- Reliable & Diverse Network
- Wide Array of Services & Customers

Advancing the
North Country
www.danc.org

Who We Are & What We Do

- Public benefit corporation established by NYS Legislature in 1985 to develop & manage infrastructure required by reactivation of 10th Mountain Division
- Revenue-driven, Authority receives no operating funds from New York State
- 85 employees
- Unique among public authorities, DANC owns and operates a number of revenue-based infrastructure facilities including water and wastewater facilities, an extensive fiber optic network, engineering services, community development and a regional landfill.

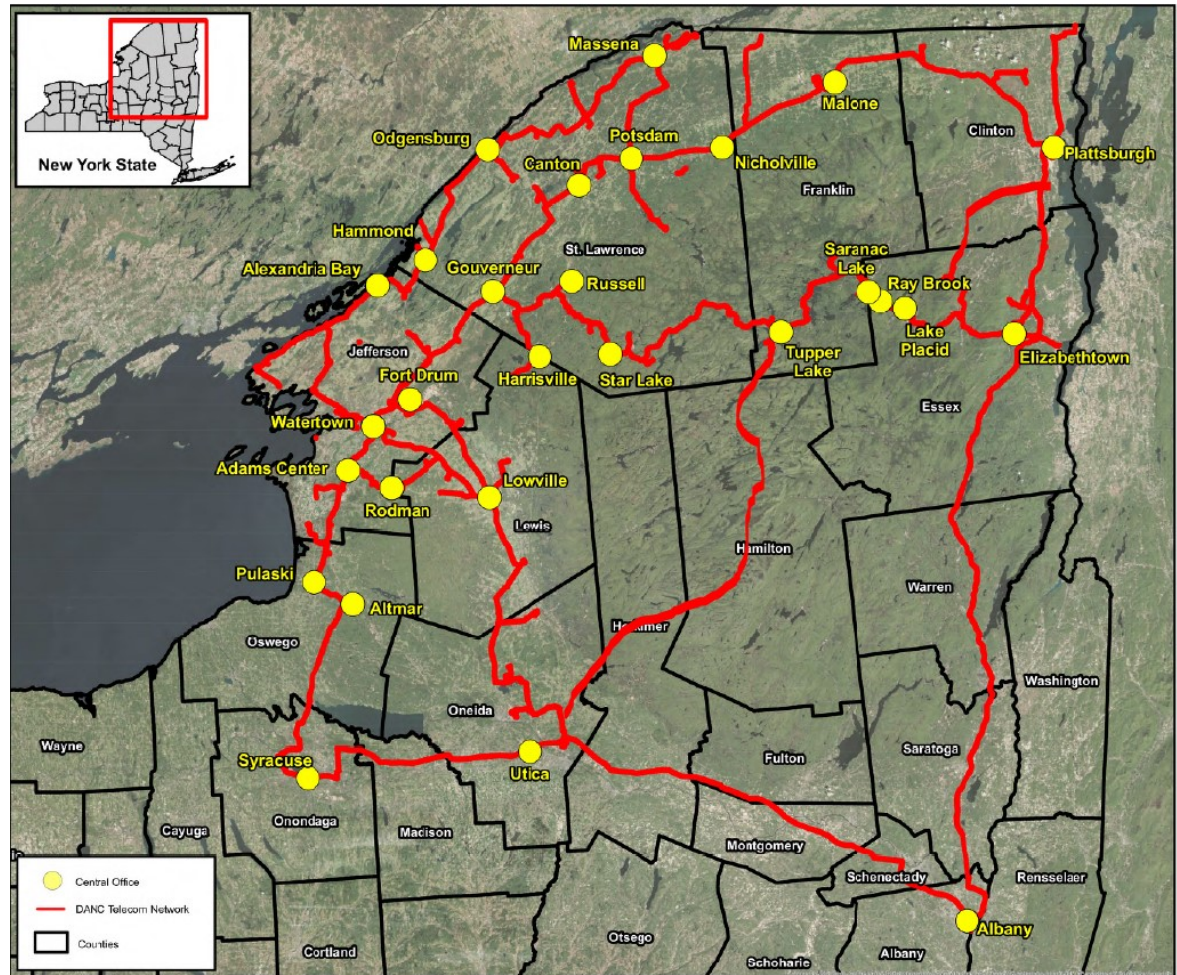

Proudly Serving Our
Partners in Development

- World Class Carrier Network
- High-Speed Broadband
- Reliable & Diverse Network
- Wide Array of Services & Customers

Advancing the
North Country
www.danc.org

Telecommunications

- 1,800 miles of broadband network connecting Watertown with Syracuse, Utica, Albany, Plattsburgh; ensures NNY has global access
- 30 Central Offices to deliver services over the network
- A regional/middle-mile network providing transport services for telecommunications carriers

Proudly Serving Our
Partners in Development

- World Class Carrier Network
- High-Speed Broadband
- Reliable & Diverse Network
- Wide Array of Services & Customers

Advancing the
North Country

Things to Consider

- Start with Goals
 - Impacts design/strategy/Communication
 - Unserved (Availability)
 - Cost (Affordability)
 - Competition (Underserved)
 - Schools
 - Economic Development/Technology Development
- Determine Services
 - Internet, Voice, CATV, streaming
 - value add – Public emergency, wi-fi corridor, healthcare apps,
- Check if already funded through some program
 - Stay on top of grant awards
 - When will the service be built (RDOF)
- Determine Available Options
- Consider all alternatives
- Select Best Solution to Match your Goals
 - Service Provider
 - Technology

Proudly Serving Our
Partners in Development

- World Class Carrier Network
- High-Speed Broadband
- Reliable & Diverse Network
- Wide Array of Services & Customers

Tupper Lake Project

- Background
 - Broadband Committee started 3 years ago
 - Surveyed downtown corridor
 - 53% had speed issues, 40% had cost issues, majority of complaints were service related (too long, hard to get in touch, slow response, etc.)
 - Many comments from unserved
- Start with Goals
 - Provide better solution for downtown corridor/business community
 - Service unserved locations
 - Wifi corridor
 - Discussed several value add – telemetry, tech center, student configs
- Determine Services
 - Drove every road in Town to verify service
 - FTTP For downtown – existing infrastructure
 - Wireless for unserved
- Check if already funded through some program
 - No other funding
- Determine Available Options
 - NBRC Grant
 - Use existing infrastructure
 - Town network with partner Service Providers –RFI, Brand TBD

Proudly Serving Our
Partners in Development

- World Class Carrier Network
- High-Speed Broadband
- Reliable & Diverse Network
- Wide Array of Services & Customers

Tupper Lake Project

Green is served area

- 90+% Served
- Drove all roads
- 125 unserved
- Used mapping

To find unserved

- Did not count State and logging Land

- 3 Wireless nodes

To serve

- Mt Morris

Proudly Serving Our
Partners in Development

- World Class Carrier Network
- High-Speed Broadband
- Reliable & Diverse Network
- Wide Array of Services & Customers

Technology Choices

- **WIREFLINE**
 - Fiber to the premise (FTTP, FTTH, GPON)
 - Cable TV (Coax or Fiber)
 - Generally more costly and time consuming
 - Should be future proof
- **WIRELESS**
 - Fixed Wireless – Wireless Internet Service Providers (WISP's)
 - Point to Point
 - Point to multipoint
 - Typically more cost-effective
 - Scalability and usage must be watched
 - Licensed versus unlicensed frequencies
 - Mobile
 - 4G versus 5G
 - 5G Prep (use as second choice)

Fixed-Wireless

Things to Consider

- Service Provider
 - Wireless or Fiber
 - Local technicians
 - Call Center
 - Reputation
 - Community Support
 - Community involvement
- Operations Support
 - Network monitoring/management
 - Installs
 - Customer Service/Repairs
 - Provisioning
 - Billing and Collections
- Sustainability
 - Financially Viable
 - Ability to Upgrade/Grow Network
 - Ability to add services
- Project Tracking
 - Is it a success – ties to goals
 - Best to develop some key performance indicators in advance and document them

Proudly Serving Our
Partners in Development

- World Class Carrier Network
- High-Speed Broadband
- Reliable & Diverse Network
- Wide Array of Services & Customers

Advancing the
North Country
www.danc.org

Things to Consider-Continued

- Speed
 - 25x3, 100x20, 100x100
 - Usage continues to increase, per US Telecom 2020 Broadband Pricing Index – Price per megabit are down 37.9% for most popular service and 56.1% for highest speeds compared to 2015
- Scalability
 - Ability to increase speeds, add services, extend network

Broadband usage will keep growing post-pandemic

 Sara Fischer, Margaret Harding McGill

Average broadband consumption per household

Gigabytes consumed, downstream and upstream

WHAT CAN WE DO

- Identify Assets
 - Municipal Assets like water towers, public emergency infrastructure, conduits, buildings, telemetry locations, your own telecom expenses, etc.
- Identify needs – many grants would be aided with assistance for municipal needs like telemetry and public emergency
- Tax Incentives – In very rural areas
- Stay Informed
 - Meet with Grant awardees
 - Track grants opportunities and progress. Invite service providers to work with you.
- Develop Goals in advance
- DANC Projects
 - Joint builds, revenue share, asset leases, swaps, etc.
- Plan for public private partnership structures/ideas
 - What organizational structure for partnering
 - Willing to own assets and work with SP?
 - Wireless assets
 - Temp tax incentives

GRANT OPPORTUNITIES

- **Emergency Broadband Benefit**
 - Commenced May 12th
 - \$50/month subsidy for low-income
 - **Emergency Connectivity Fund**
 - \$7.2 Billion for Schools and Libraries
 - PC's, tablets, wifi hotspots, broadband connections for students, staff, and libraries
 - 45 days for application so be prepared
 - **NTIA Consolidated Appropriations Act**
 - \$300 million fund
 - Must be public/private partnership
 - Open now, due August 17
 - Prefer service at 100/20
 - **NTIA Tribal Grant**
 - \$1 billion fund
 - Tribal Government, organizations, communities – can partner with ISP's
 - **ReConnect Phase 2 – Closed 4/15 but watch for winners**
 - **American Rescue Plan**
 - \$350 Billion for States
 - **PSC Settlement Fund**
 - Small amount, may help to fill small gaps, opening Sept. 2021
 - **Public Safety Grants**
 - **RDOF Phase 2 - \$4.4 Billion**
 - Rural Development Opportunity Fund
 - Waiting for better mapping

Questions

dwolf@danc.org

- Reminders:
 - Develop Goals
 - Asset List
 - Community Needs
 - Meet with Grant Awardees
 - Stay in touch with service providers (liaison)
 - Expect demand to increase so plan ahead
