# Providing Fire Protection in Your Community

**Tug Hill 2025 Local Government Conference** *April 1, 2025* 

Presented by

Dan Acquilano, Manager of Local Training, Division of Local Government and School Accountability, OSC

Katie Hodgdon, NYAOT Association Counsel

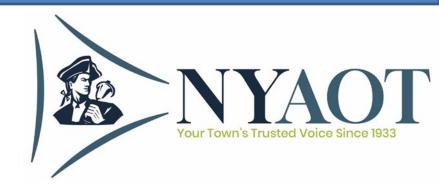

## **Topics to Discuss**

- General overview
- Fire protection cities and villages
- Fire protection towns
- Fire districts
- Fire district budgets
- Fire district reporting requirements
- Fire protection districts
- Benefits afforded to volunteers
- Any other questions!

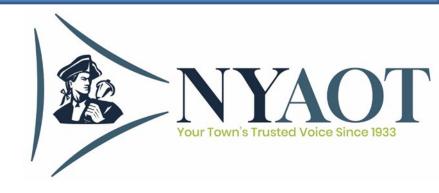

## General Overview - Fire

#### **General Overview**

- Firefighting in your locality is either provided by paid firefights, volunteer firefighters or a combination thereof
  - Depends on the locality!
- Different types of fire protecting entities:
  - Fire districts (towns)
  - Joint fire districts (towns/villages jointly)
  - Fire protection districts (towns)
  - Fire departments (cities, villages) (towns?)
  - Fire companies (cities, villages) (towns?)

# Fire Protection – Cities & Villages

## Cities & Villages - Fire

- Generally speaking, fire protection provided by the city or village fire department
  - Paid or volunteer
  - Cities: typically paid
  - Villages: typically volunteer (don't forget LOSAP!)
- Fire department may provide fire protection to other municipalities outside of their jurisdiction
  - Contract (e.g., with town fire protection district)
  - Mutual aid
- Generally a part of the locality's budget (not its own taxing district)
- Cities are <u>not</u> required to provide fire protection

#### Cities - Fire

• City fire departments are established by the city's charter

• Organizational structure will depend upon the charter – will vary depending upon the city

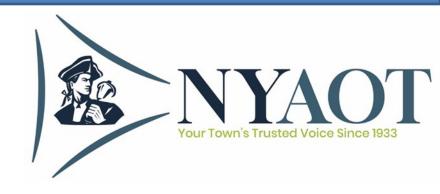

• Typically comprised of paid, career firefighters

• General fund funds city fire departments, including salaries, personnel charges, equipment

## Villages - Fire

- Village fire departments generally established by Article 10 of Village Law
- Villages are <u>not</u> required to provide fire protection
- Structure can vary appointed board of commissioners or council of fire department with village board of trustees
  - Village should know organizational structure of its fire department(s)
- Typically volunteer
- Funded through village general fund
- Can contract with other localities to provide fire protection

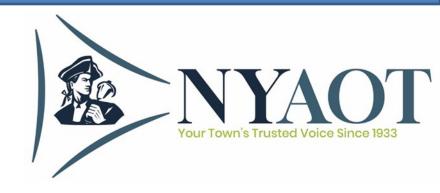

## **Fire Protection - Towns**

#### **Towns - Fire**

- Unlike cities and villages, towns are <u>required</u> to provide fire protection within its boundaries
  - No authority to establish fire departments or fire companies
- Generally speaking three mechanisms to provide this required fire protection in towns
  - 1. Fire districts;
  - 2. Fire protection districts (not the same thing!); and
  - 3. Joint fire districts (town-village)

## **Fire Districts**

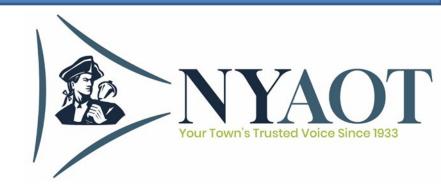

- Fire districts are established pursuant to Article 11 of Town Law
  - Either by 1) Motion of town board or 2) petition of residents within potential district
  - Public hearing determination that formation is in the public interest
  - If located within Adirondack Park and comprised of more than 30% state lands (aka tax exempt), state comptroller consent is required
- Fire districts <u>cannot</u> include a village *unless* the village was incorporated after the fire district was formed (but see joint districts)

- Fire districts are their <u>own</u> political subdivision with its own elected officers (fire commissioners) that serve as the governing board
- Fire districts develop and implement a budget
- Not included in the town's tax cap
- May contract with other fire protection entities to provide fire protection outside of the fire district
- Fire districts are mostly comprised of volunteer firefighters
- Can also provide emergency response services

- *Joint* fire districts may be created by a town and village and encompasses town and village property
- Can involve the dissolution of a town fire district and establishment of new joint district
  - Usually after a study to determine if it is in the best interest of the public
- Public hearing is required and establishment is subject to permissive referendum
  - If a petition is filed by residents within certain timeframe, establishment must be approved by voters

- Board of fire commissioners: elected governing body of fire district / joint fire district
  - Required to attend training within 270 days of taking office
  - Designate depository for district moneys (General Municipal Law section 10)
  - May invest moneys pursuant to investment policy (General Municipal Law section 11)
  - Oversee fire district property (real and personal [e.g., apparatus])
  - Responsible for general oversight of district

## Fire District Budgets

- Fire district budget edition!
- Commissioners in fire districts must compile a budget that is assessed, levied and collected at the same time and in the same manner as town taxes (January in most towns outside of special tax act counties)
- Subject to tax cap (override by supermajority)
- Commissioners must develop and adopt proposed budget on or before 21 days before public hearing and file with fire district secretary
- Public hearing –during the third week in October

- Fire district secretary must provide notice of public hearing to town clerk and to any other entity the fire district contracts with
- Notice of public hearing on proposed budget must be published in official paper at least <u>five</u> days before the date of the hearing
- Notice must include date, time and location of public hearing, as well as the purpose (proposed budget) and that a copy is available at town clerk's office (or fire district secretary) where it can be inspected during office hours
- If the fire district has a website, the notice must also include that the proposed budget is available on the website
- Notice must also be posted on the town clerk's signboard and on the fire district website

- Public hearing any person may speak regarding the proposed budget
- Public hearing occurs during third week of October
- After public hearing, commissioners may make changes prior to November 4
  - Cannot add or increase an appropriation to a capital reserve fund
- Must adopt final budget by November 4
- Fire district budget must be filed with town clerk by November 7

- The town <u>cannot</u> alter the fire district budget once adopted and delivered
- Town clerk must "affix" two certified copies of the fire district budget to the adopted town budget and deliver same to the town supervisor within five days
- Within ten days from that point, town supervisor must provide the budget to the county for the county to assess and levy upon the taxable real property in the town
- \*\*Fire district cannot <u>collect</u> taxes- town collecting officer collects taxes on behalf of the fire district and immediately pays fire district moneys to town supervisor, who remits funds to fire district "immediately"

- Towns are required to make fire districts whole first – before the town or county
- Common question where does it say I have to make the fire district whole first? Town Law § 181
  - "When such taxes are collected, the amount thereof shall be paid to the supervisor of the town and by him immediately paid to the treasurer of the respective fire districts"

- Technically speaking, taxes should be paid to credit of supervisor and immediately transmitted from supervisor to fire district
- Does this always happen?
- As long as fire district is made whole first, in compliance with intention of the law
- Does the town board have to approve and audit the transfer to the fire district? NO!!
  - -Just because the town receives the money does not mean it is the town's money to be accounted for

• What if the county fails to levy the fire district budget, despite the town clerk appending it to the town's budget and the supervisor delivering it to the county as statutorily required?

• !!!

• Or, what happens when we have to make a fire district whole on a budget that was never levied?

- Town attorney called "clerical error" (term of art in RPTL Article 5) at county level and fire district budget was not included in the levy
- As previously discussed, Town Law section 181:
  - Fire district provides budget to town in timely fashion
  - Town affixes fire budget to its budget without any changes
  - Levied by county
  - Town collects and transmits immediately to FD

- Series of unfortunate events:
  - Town affixed fire district budget to its budget
  - Fire district budget was not on the cover sheet
  - County did not levy because it only looked at the cover sheet (what's the moral of this story?)
  - Where are the fire district taxes?
  - Options considered by the town attorney:
    supplemental tax will with additional moneys added
    - Nope! No levy, no authority
  - Clerical error nope! Not a clerical error, just a huge regular error

• What to do?

- CYA provision in the law County Law section 227: Legalizing Acts
- The board of supervisors of any county shall have the power to legalize and validate a defect that includes:
  - Failure to perform an act within the time prescribed by law – which includes failure to levy fire district taxes that were timely provided!
- Public hearing is required before legalizing / validating the act

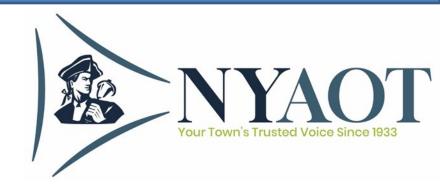

- Procedure: Town or fire district provides petition to board of supervisors setting forth the facts
- Public hearing with notice published five days in advance and posted in three conspicuous public places
- 2/3 approval of county board required
- Once approved, certified copy must be published once a week for two weeks
- Publication costs borne by petitioner

- Practical considerations:
  - What happens after county legalizes and fire district budget is levied?
  - Interest-free period?
  - Costs of mailing?
- Uncharted territory practical solution is to accept payments for 30 days penalty-free from the date of the "levy," relying upon Article 9 of RPTL
- Moral of the story- read past the cover sheet (be thorough!) to ensure all taxes are levied

## Fire Districts – Reporting Requirements

- Annual Financial Report required to file (formerly AUD, now AFR)
- Foreign fire insurance report
  - -2% tax moneys
- Independent audit if fire district revenues exceed more than 400k, annual audit is required!

- Towns also have the ability to establish fire *protection* districts, which are dramatically different from fire districts (which also provide fire protection just not in the district name!)
- Not confusing at all!
- Geographic area of the town that is created (improvement district) to provide fire protection to residents in the fire protection district
  - Via contract with a city fire department, village fire department, fire district or fire company

- NOT a separate political subdivision it is created by the town board or by petition of residents
- Once created, the town board is the governing body responsible for executing fire protection contracts
- Fire protection district costs / contract is a part of the town budget and is included in the town's tax cap calculation

- Once fire protection district exist, town is required to contract on behalf of taxpayers served to provide fire protection
- Contract must have a sum certain for all services rendered
- Contract cannot exceed five years
  - Prohibited from binding future boards
  - Must conduct a public hearing before approving contract notice published at least ten days in advance
- Contract can also be on a year to year basis renewed on a yearly basis without public hearing (cannot exceed five years)
  - K can provide that town clerk notify fire company in July of pending renewal and that parties may terminate renewal in writing before August 20 for following year

- Contract may also provide for provision of emergency services (outside of fire)
- Payments to company can be made in one lump sum or in installments – contract governs
- Consult your municipal attorney before authorizing!

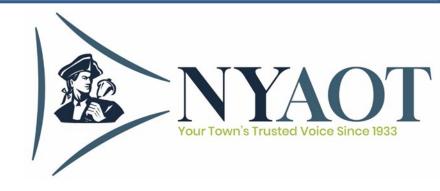

## **Financial Transparency**

- New-ish requirement (2017)—required to provide financial information to towns / contracting entity
- Before negotiating with incorporated fire company on behalf of fire districts, fire company is required to provide:
  - A statement itemizing the estimated costs of the incorporated fire company attributable to the provision of services under the prospective contract which shall include, at a minimum, those, if any, for:
    - Supplies; materials; operation, maintenance and repair of equipment and apparatus; insurance; training; protective clothing, gear and other personnel costs; building rental, maintenance and operation; and a specified proportionate share of capital costs.

## **Financial Transparency**

- New-ish requirement (2017)—required to provide financial information to towns / contracting entity
  - Additionally, if the fire company is required to prepare any of the following documents, copies <u>shall</u> be included with the statement:
    - (1) the fire company's most recent annual report of directors pursuant to section five hundred nineteen of the not-for-profit corporation law;
    - (2) the fire company's most recent verified certificate pursuant to subdivision (f) of section fourteen hundred two of the not-for-profit corporation law;
    - (3) the fire company's most recent internal revenue service form 990; and
    - (4) the fire company's most recent annual report pursuant to section thirty-a of the general municipal law.
- Upon good cause shown, the town board may, by resolution, waive in whole or in part the requirement that the fire company file the statement, and copies of documents mentioned above

## **Benefits Afforded to Volunteers**

#### **Benefits to Volunteers**

- Length of Service Award Programs LOSAP
- Provides "pension-like" benefit to volunteer firefighters
- General Municipal Law section 11-A: volunteer firefighters
- Funded by local government (sponsor)
- Adoption of plan requires 60% of governing board approval and approval at a **mandatory referendum** 
  - Defined contribution or defined benefit program
- Once established, annual audit by CPA or independent public accountant required must be completed within 270 days of close of fiscal year

#### **Benefits to Volunteers**

- Sponsoring entity creates a point system that establishes how LOSAP credit is earned by volunteers
  - Responding to incidents
  - Training courses
  - Elected or appointed position
  - Drills
  - Meetings, etc
- 50 service award points annually = one year of firefighting service (LOSAP service credit)
- Fire company must provide certified list to sponsor that identifies all volunteers that received at least 50 points during the preceding year
- Five years of service required before benefit kicks in

#### **Real Property Tax Exemption**

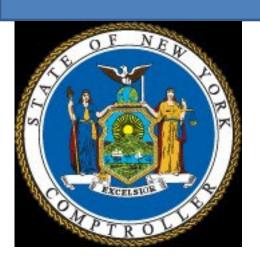

Expansion of Emergency Services Responder Exemption

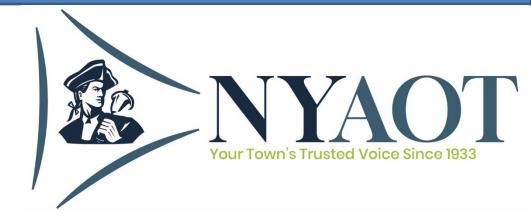

- 2022: State enacted legislation that authorized local governments to adopt a local law or resolution offering residential real property tax exemption of up to 10% to volunteer firefighters and ambulance workers (RPTL 466-a)
  - Minimum service requirement of 2-5 years
- Many questions arose, including eligibility of emergency service responders that volunteer in a neighboring jurisdiction
- Effective September 20, 2024- locality can amend (or enact) legislation to extend exemption to any resident volunteer firefighter or ambulance worker that provides their volunteer services to a neighboring city, village, town, county or school district
- Note that each jurisdiction has to opt in for the exemption to apply to that tax base (town, county, school, village)

#### **Real Property Tax Exemption**

#### **Emergency Services Responder Exemption**

- If your locality provided this exemption prior to 2022 (via special legislation), new local law opting in is required by December 9, 2025
- Volunteer cannot receive <u>both</u> real property tax exemption AND personal income tax credit (\$400) – individual must decide which tax benefit works best for their personal situation

Questions?

dacquilano@osc.ny.gov khodgdon@nytowns.org
